

PIPE FITTINGS

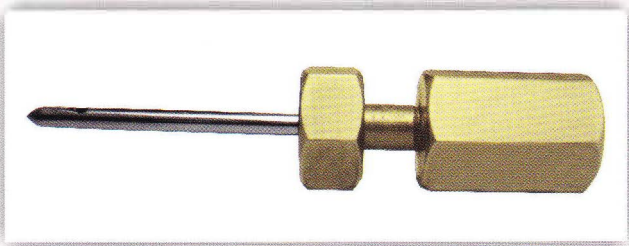

TEST PLUGS

Made from Solid Brass on accurate turning machine. Reliable for taking temperature / pressure measurement which is crucial in HVAC systems

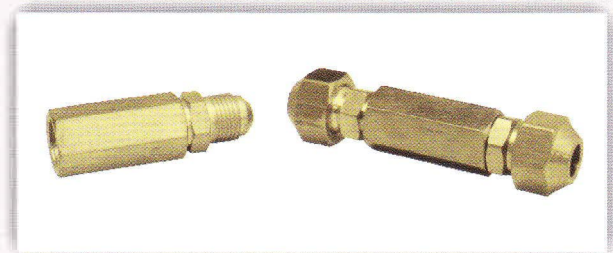

AIR VENT

Made from solid Brass & high quality plastic components, very useful for Venting out air in HVAC systems.

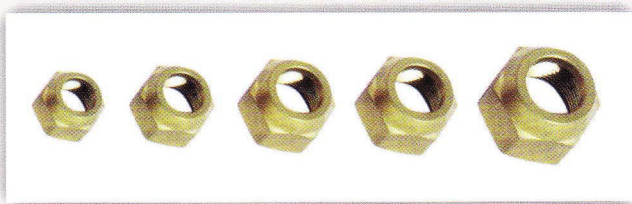

TEST PROBE

Made of high quality Brass with Stainless Steel needle to be attached with pressure gauge for pressure measurement

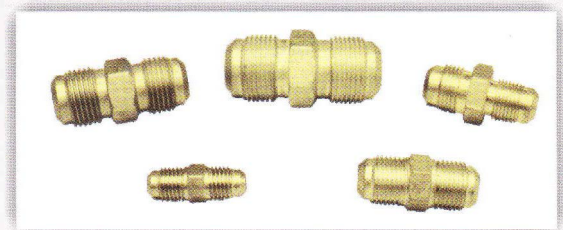

FLOW REGULATOR

Made of high quality Brass to regulate the flow of Air Compressor. Inbuilt with stainless steel filter to arrest dust particles if any

FLARE NUTS

Made from high quality solid Brass for use with all types of pipes in HVAC systems

UNIONS

Made from high quality Solid Brass. Used for connecting pipes in HVAC systems

STEEL SYPHON

Available in mild steel, stainless steel or brass.
Available in 'U' type or Round version.
Standard sizes available in 1/4" to 1/2" Supplied with coupler and lock nut.

BRASS GAUGE COCK / VALVE

Solid Brass construction with ABS plastic handle. .
Available insizes 1/4" to 1/2"
Designed in male x male, female x female
or male x female as per your requirement.
